RESEARCH INTERESTS

Broadly interested in *in-situ* and *operando* electron microscopy and advanced characterisation for probing structure-property relationships in functional materials. My work centres on correlated oxide systems, but I am motivated by any problem where nanoscale dynamics - phase transitions, domain evolution, defect-mediated phenomena - can be resolved through TEM, electron diffraction, and spectroscopy. I also integrate computational tools (image simulation, 4D-STEM analysis, spectral processing) with experimental microscopy to extract quantitative insights.

EDUCATION

Indian Institute of Science (IISc)

BS-MS in Materials Science

Oct 2022 - Present

Bengaluru, India

- **Master of Science** (Expected Jul 2027)
- **Bachelor of Science (Research)** (Completed Apr 2026)
- **CGPA:** 8.3/10 (First Class) **Previous Semester TGPA:** 9.7/10
- **Focus:** Electron Microscopy, Raman Spectroscopy, Functional Materials, Characterisation, Opto-Thermal Mechanisms, Mechanical Behaviour

RESEARCH EXPERIENCE

Opto-Thermal Studies on VO₂ Microwires Using In-Situ Raman Spectroscopy

Bachelor's Thesis · Supervisor: Prof. Pavan Nukala

Aug 2025 - Present

Centre for Nanoscience Engineering

(CeNSE), IISc

- Investigating the modulation of the metal-insulator transition (MIT) temperature in VO₂ microwires through controlled nano-indentation, correlating strain with shifts in transition characteristics
- Performing *in-situ* opto-thermal experiments using **Raman spectroscopy** as both a probe and stimulus, mapping MIT behaviour as a function of laser power density and exposure duration across different temperatures
- Currently characterising nanoscale phase domain evolution during the MIT using **TEM**, aiming to resolve the monoclinic-rutile structural transformation at the domain level
- **Tools:** Raman Spectroscopy (LabSpec 6, Fityk, Origin), Nano-indentation (Park AFM NX20), **Python** (SciPy, NumPy, Matplotlib, LMFIT), COMSOL Multiphysics, Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM), X-Ray Diffraction (XRD)
- **Instruments:** Park AFM NX20, Horiba LabRAM HR Raman Spectrometer, ThermoFisher Tecnai T20-ST, ThermoFisher Titan Themis, Apreo 2S, Rigaku X-ray Diffractometer

Electro-Thermo-Mechanical Behaviour of Tin

Research Project · Supervisor: Prof. Praveen Kumar

Aug 2024 - Jul 2025

Department of Materials Engineering,

IISc

- Performed **EBSD** orientation mapping to analyse texture evolution and grain boundary character distribution
- Conducted complementary **SEM**, **EDS**, and **WDS** analyses to understand composition and gain microstructural insights
- **Tools:** EBSD, EDS, WDS, SEM
- **Instruments:** Apreo 2S, ThermoFisher Helios G4-UX

INTERNSHIP EXPERIENCE

Summer Research Intern - Texture Analysis of Electrical Steels

Supervisor: Prof. S. Karthikeyan · Garrett Motion

May 2024 - Jul 2024

IISc

- Conducted a comprehensive literature survey on crystallographic texture in electrical steels, covering orientation distribution functions (ODF), inverse pole figure analysis, and X-ray/electron diffraction techniques

- Studied grain boundary engineering approaches for optimising the Goss texture component to minimise core losses in Si-Fe transformer steels

TEACHING EXPERIENCE

Teaching Assistant | Materials Design: Electronic, Electromechanical & Optical Functions (NE 240) | IISc *Aug 2026 - Dec 2026*

Physics & Chemistry Tutor | Tutored multiple high school students (grades 9-12) *Jan 2026 - Present*

TECHNICAL SKILLS

Microscopy: TEM · SEM · EBSD · EDS/WDS · AFM

Spectroscopy & Other: Raman Spectroscopy · X-Ray Diffraction (XRD)

Simulation & Analysis: COMSOL Multiphysics · CrystalMaker · CrystalDiffract · Origin · ImageJ · Fityk · LabSpec 6

Programming: Python (HyperSpy, abTEM, py4DSTEM, SciPy, NumPy, Matplotlib, pandas, scikit-image, LMFIT) · LaTeX/Typst · C · Java

Languages: English (Fluent, IELTS Band 8.0) · Hindi (Fluent) · Marathi (Native)

CONFERENCES

2025 IEEE South Asia Ferroelectrics Symposium (SAFS) | Attended technical sessions; volunteered for on-site coordination *5-8 Aug 2025*

EMSI 2025 Conference | Attended technical talks; assisted with on-site logistics *12-14 Jul 2025*

AWARDS & FELLOWSHIPS

Kishore Vaigyanik Protsahan Yojana (KVPY-SA 2020) Fellow - All India Rank 297 | Fully funded federal scholarship program, Dept. of Science & Technology, Govt. of India *2020-21*

Microsoft Certified: Azure AI Fundamentals | Microsoft *Jun 2021*

EXTRACURRICULAR & LEADERSHIP

Convenor | Amalgam | UG Materials Science Club, IISc · organised Open Day 2026 showcase for 50,000+ visitors *Jun 2025 - Mar 2026*

Core Team Member | Grain Boundary | Student-run club of the Materials Engineering Dept., IISc *Jun 2025 - Jun 2026*

Recreational Coordinator | Pravega XI | Core Committee of India's largest student-run SciTech-cultural fest, IISc *Jan 2025*
